Profile

Information Technology student specializing in Web and Mobile Application development. Builds practical products across the frontend, backend, and data layers, with hands-on experience in Flutter apps, REST APIs, offline-first synchronization, and database-backed systems. Seeking a software engineering internship where I can contribute to mobile, web, and backend products.

Education

FEU Institute of Technology — Expected Graduation: August 2027
BS Information Technology - Web and Mobile Application (WMA)

Technical Skills

Programming: PHP, Java, Kotlin, Swift, C/C++, JavaScript, Dart, Python, HTML5/CSS3, SQL
Frameworks and Libraries: Flutter, Node.js, Express, Laravel, CodeIgniter, SvelteKit, Spring, WordPress Core
Databases and Deployments: MySQL, PostgreSQL, SQLite, Relational Schema Design, Firebase Admin, Railway, Render, Vercel, cPanel
Platforms and Tools: AWS, GitHub Pages, Cloudflare Workers, Git, GitHub
Core Competencies: RESTful API Architecture, Cross-Platform Mobile Development, Backend Architecture, Offline-first Systems, UI/UX

Selected Projects and Engineering Work

PicKape - Coffee Quality and Traceability System

Group capstone | Tech Stack: Flutter, Dart, Node.js, Express, SQLite, MySQL, Firebase Admin, REST API | pickape.com

- Developed a Flutter mobile app for authentication, dashboards, batch management, QR scanning, and farm-to-harvest traceability.
- Implemented an Express REST API with bcrypt authentication, image uploads, role flows, and mobile-client data operations.
- Designed offline-first synchronization with local SQLite so field records persist without connectivity and sync when the network returns.
- Connected SQLite and MySQL storage with Firebase Admin; added PQI quality sorting, live dashboard views, and auditable batch records.

Deadline Tracker - Assignment and Exam Reminder App

Personal project | Offline mobile productivity app

- Built an offline planner for assignments and exams with due dates, course names, and task types.
- Added a weekly view of upcoming work, sorted by deadline for quick review.
- Used local SQLite storage so core features work without a backend connection.
- Implemented scheduled reminder notifications before deadlines.

Additional

Languages: Chinese (Native), English (Basic Communication) | **Target role:** Software Engineer Intern
